

### **Timber Ranges**

As with all our products you can be sure that our timber ranges meet the highest standards. Our timber doors and accessories are sourced from the finest suppliers and, due to their sophisticated design and superior workmanship, not only look beautiful but can also be expected to remain looking beautiful throughout their lifetime. Offered in a large number of styles and finishes, our timber ranges can be relied on to please even the most discerning customer.

### **Sourcing**

In the production and sourcing of solid wood and veneered products, great care is exercised in the selection and quality of suitable materials. Every effort has been made to source FSC certified products.

### **Grain**

As solid timber is a natural living product, it is not possible or desirable to strive for total uniformity of shading and grain pattern. Our aim is, at all times, to operate within controlled parameters that recognise variations as both acceptable and aesthetically pleasing.

### **Curved Mouldings**

Curved mouldings are crafted from solid timber only, unlike straight mouldings which are veneered. The process of creating curved mouldings requires a build up of several pieces of timber being laminated together and then shaped accordingly. The nature of this process, coupled with the curved shape, will result in a proportion of end grain showing. This curved end section will always be comparatively darker in colour than straight sections (just as the top of a door where rail meets stile shows end grain that is always darker in colour).

### **Light Affecting Colour**

Wood changes colour when exposed to light. Species of the timber and the intensity of exposure will affect the rate of change. It is advised that colour change is taken into consideration when replacing or fitting new doors some time after the original kitchen has been installed.

### **Moisture**

Timber is hygroscopic meaning it absorbs and releases water depending on its surrounding environment. Due to this being out of our control we recommend all timbers are stored and installed in areas that have been properly acclimatised over a period of time.

### **Gloss and PVC Finished Ranges**

Certified by CATAS, all our PVC and gloss finished ranges will withstand the daily rigours of use without ever looking worn or tired. The mirror-like finish on all our gloss ranges is guaranteed not to peel, which will leave you feeling confident that you are buying the best product of its kind on the market.

### **Strada Gloss**

Strada Gloss is a slab door with integrated handles and an over painted 22mm MDF core with gloss polyurethane finish.

### **Windsor Ranges**

Our 5-piece PVC ranges have durable finish that is guaranteed not to peel. Certified by CATAS to demonstrate their excellent quality, you can be confident that when you purchase this product you are buying the best of its kind available in the market place.
